Quick Setup Mobile (Bluetooth HID)

1.) Enter Pairing Mode

Un-pair/Pair Bluetooth

Scan this barcode code to disconnect from any previously connected devices and put the scanner into "Pairing mode".

2.) Enable Bluetooth on your mobile device

Go to your phone's homescreen and find **"Settings"**, then **"Bluetooth"** and turn Bluetooth on. Your device will search for available devices within range.

After approx 20 seconds, Saveo Scan will appear as an external keyboard with a unique identifier serial number (**SAVEO-RNG-G2-xxxxxxx**).

Select the scanner from "Available Devices" and wait for pairing process to complete.

Once "Connected" is displayed, your device is paired to the scanner. Your scanner is now ready to use.

Please Note: Devices only need to be paired once. When they are within Bluetooth range they will automatically attempt to connect to each other. If you wish to connect to another device it is recommended you first unpair this device.

Quick Setup PC/MAC (Bluetooth HID Dock)

1.) Connect Dock to USB Port

Simply connect the dock to a free USB port on your computer using the USB Cable and scan the dock's barcode to pair & connect your scanner. The dock is plug and play, so no driver is required for Bluetooth HID mode.

Transmission Modes

Direct Mode (Default)

Memory Mode

Memory Data Upload

Total Storage Count
