OrcaScan

Drug Tracking
training guide

Table of Contents

Introduction

The Orca Scan Drug Tracking solution provides the following benefits:

- Track drugs using existing medication barcodes, (no need to create new barcodes).

- Get notification emails when stock is low by setting "Min Stock" level.

- Get notification emails when overstocked by setting "Max Stock" level.

- Product name, batch number and expiry date automatically populated.

- Get an in-app notification when an expired drug is scanned

- Use existing hardware (smartphones, tablets or barcode scanners).

- Every scan stored securely in the Cloud.

- Access your data from any web browser or smartphone.

- Share data across multiple sites/locations.
Getting started with Orca Scan

**1.** Visit the Google or Apple app store

2. Download the Orca Scan app

4. Create a new sheet using the Drugs template
3. Register for an account

How to setup your drug inventory?

**1.** Scan medication barcode

2. Confirm drug information & enter quantity

3. Save the changes

How to track drugs across **multiple** sites/locations?

1. Create a sheet using the "Drug Tracking Template"

**2.** Add fields to capture additional information (if required)

**4.** Add the relevant users to the correct sheets

3. Duplicate the sheet for each location

How to set up a **low stock** notification?

1. Login to the Orca Scan web application

**2.** Search for the item

3. Enter Min Stock value

How to set an overstock notification?

1. Login to the Orca Scan web application

2. Search for the item

3. Enter Max Stock value

Notes

Notes

OrcaScan

Barcode Tracking, Simplified.

Approved by GS1, Orca Scan makes it easy to track medication, medical devices, prescription drugs, or indeed anything with a barcode.

Using just smartphones, Orca Scan removes the need for expensive hardware and custom software development whilst also delivering true interoperability by working with existing Zebra, Datalogic, and Honeywell scanners and providing a simple API to connect to existing systems.

Orca Scan empowers healthcare professionals to improve patient safety; deliver financial savings; exceed regulatory compliance, and remove the time-consuming, error-ridden stresses of pen and paper records.

Orca Scan's cloud-based system allows you to view accurate data in real-time, providing you and your team with complete visibility and traceability of medicines and medical devices from any web browser or mobile device.
